Experience

Senior Software Engineer @ Walmart, Inc., Bentonville, AR

Jun 2025 – Present

- Own backend systems for Walmart's warehouse management platform and lead a team of 3 engineers - Java/Spring Boot services handling inbound logistics across 21 fulfillment centers at 99.99% uptime.
- Built a one-click disaster recovery solution, a Java library plus a configuration UI, that fails over SQL databases, Kafka clusters, and Kubernetes deployments to a secondary region. Cut recovery time from hours to minutes. Adopted by 25+ teams across Walmart Supply Chain.
- Co-designed a shared Java library implementing the Transactional Outbox pattern for reliable event publishing over Kafka, REST, and MQ. Adopted by 30+ teams across the Walmart WMS org.

Software Engineer III @ Walmart, Inc., Bentonville, AR

Jul 2022 – Jun 2025

- Migrated a 20-year-old legacy on-prem WMS monolith to cloud-native microservices on Kubernetes, now running in all 21 Sam's Club fulfillment centers.
- Built event-driven order pipelines with Apache Kafka — 100K+ events/day with guaranteed state transitions and zero message loss.
- Set up CI/CD pipelines (Jenkins, Docker, SonarQube) for on-demand deploys across dev, QA, stage, and prod with consistent quality gates and a bi-monthly release cadence.
- Introduced Liquibase for database schema versioning and wired it into CI/CD, eliminating schema drift across environments.
- Led an org-wide effort to redact PII and HIPAA data from logs across Sam's Club Supply Chain tech, bringing the org into SOX compliance.
- Cut \$80K/month in Azure costs by building dashboards that helped teams identify overprovisioned services and inefficient usage patterns.

Projects

CampusLore — AR iOS app that recognizes campus statues through the camera and plays their stories. Built a local CNN for real-time detection. *C#, Python, TensorFlow*

Self-Driving Navigation Robot — Two-wheeled rover that uses reinforcement learning and ultrasonic sensors to navigate around obstacles on real hardware. *Matlab, Raspberry Pi, RL*

Education

University of Dayton

Aug 2020 – May 2022

Master of Computer Science (*GPA: 4.0*),

Graduate Certificate in Autonomous Systems and Data Science

Jawaharlal Nehru Technological University, Kakinada, BTech in Computer Science

Aug 2015 – May 2019

Technical Skills

Languages: Java, JavaScript, Python, Shell

Backend: Spring Boot, REST APIs, Microservices, Event-Driven Architecture, Hexagonal Architecture

Messaging & Streaming: Apache Kafka

Cloud & DevOps: Microsoft Azure, Kubernetes, Docker, Jenkins, SonarQube, CI/CD

Databases: Microsoft SQL Server, Azure SQL, Liquibase

Observability: Grafana, Splunk

Tooling: Git, Agile/Scrum
